

Partition-level evidence · pair D1 · seed 41

Selected partition 0 processing backlog · invalid/transition observations remain gaps

Acknowledged admissions and distinct completions during evaluation

Keep 3: lag coverage 99.2%; Schedule 3 → 6: lag coverage 89.2%

Completion rates can include messages admitted before evaluation; unfinished outcomes use the evaluation-admission cohort. Changing owners or shared-node performance can affect progress. Scaling does not divide one partition between concurrent owners.
